No Fund Risk Number Available

The fund risk score is based on historic volatility, as measured by standard deviation of returns, of the fund over the indicated time period. The historic volatility is then translated to the fund risk level which is a whole number ranging from 1 (least risky) to 10 (most risky). Fund risk scores provide a retrospective view of a fund's volatility, which may vary widely over different time periods, and are not necessarily indicative of a fund's future volatility.
