* Fund manager data for fixed interest funds may not identify yield as running or redemption yield. Old Mutual Wealth Ltd and Old Mutual Wealth Life & Pensions Ltd assume these are redemption yields, as their provision is an FCA regulatory requirement.

Important Information

Past performance has been based on prices that include simulated values. All performances are inclusive of any net reinvested income and exclusive of any reinvested rebates. Performance figures and yields are as at 28/02/2021. A minority of funds also feature a performance related fee which is not shown here. Please refer to your Funds List for further information. Source: FE. The value of investments and the income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Past performance is not a guide to the future.

Investment Objective

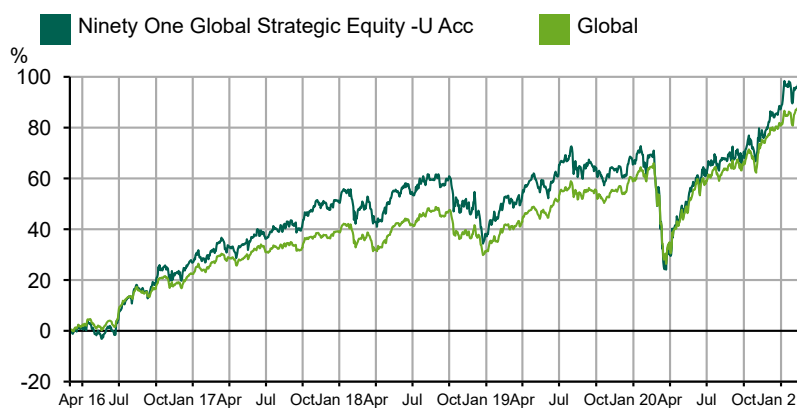

The Fund aims to provide capital growth (to grow the value of your investment) over at least 5 years. The Fund invests primarily (at least two-thirds) in the shares of companies around the world and in related derivatives (financial contracts whose value is linked to the price of the shares of such companies).

Old Mutual Wealth Risk Evaluator as at 28/02/2021

Over 1 year	1	2	3	4	5	6	7	8	9	10
Over 3 year	1	2	3	4	5	6	7	8	9	10
Over 5 year	1	2	3	4	5	6	7	8	9	10

The fund risk score is based on historic volatility, as measured by standard deviation of returns, of the fund over the indicated time period. The historic volatility is then translated to the fund risk level which is a whole number ranging from 1 (least risky) to 10 (most risky). Fund risk scores provide a retrospective view of a fund's volatility, which may vary widely over different time periods, and are not necessarily indicative of a fund's future volatility.
